

WHY SCAN LABELS? **BETTER PAY!**

When contractors go to lower-paid fabricators, pitting worker against worker, it pushes down everyone's pay.

Wage equalization is how we fight it. When product goes from a lower- to higher-wage area, workers should get paid the higher rate. Pay is equalized. You get more money or benefit from work staying in your local when there is no financial incentive to fabricate elsewhere.

But you must scan the labels, which tell where products are from, for wage equalization to happen. Scanning means more money and work for you.
