

WHY REPORT IT?

PROTECT JOBS AND PAY

Sheet metal with no union label could mean it was made in lower-wage areas. That undercuts union jobs and wages.

Contractors aren't required to use union products, but they've agreed to pay union rates. Let your local know about unlabeled materials so it can enforce the contract provision that removes any incentive to go low.

Reporting unlabeled product encourages contractors to stick with union workers. Use the label app to report and protect yourself.
